

## Imaging Consent

This clinic takes medical images to assist our doctors with diagnosis and monitoring of your skin as part of skin cancer screening, surveillance and treatment.

We use a system provided by MetaOptima called Dermengine.

You will be provided with secure access to your images via the secure Molescope app.

Your privacy and well-being are of utmost priority. In compliance with worldwide medical regulations, images and related clinical data are stored on Dermengine's encrypted cloud-based intelligent dermatology platform.

Images will only be used with your explicit permission for the purposes you consented to as below.

---

**I consent to medical photography for the following purposes which BSCC requires to provide optimal care to me:**

- **Medical records** - a copy will be kept on the practice's online system - YES / NO
- **Communication** - transfer of medical information to other health care professionals involved in your care ( eg pathologist, plastic surgeon) - YES / NO

De-identified images MAY be used for the below:

- **Education to other health care professionals** - eg doctors, nurses, medical students - YES / NO
